Generate an animated SWF video from all PNG files in the folder. Support converting PNG Files to SWF with a delay time between each PNG Files. Before getting started with Microsoft Windows, it's a good idea to familiarize yourself with a few crucial terms. This can be a tedious chore, but it does pay off in the long run! Here are definitions and explanations of some of the most important ones. Computer & Hardware Hardware refers to a computer's physical components including the processor, memory, graphics card, motherboard and hard drive. Computer Software Computer software is any type of computer program that is used to do any number of different tasks. From word processing to video editing, the list of what's possible is huge! Computer Operating System An operating system is the basic system software that tells your computer how to use the hardware. Windows, Mac OS, iOS and Android are examples of operating systems. Computer Basic Concepts Like computers, all devices (smartphones, tablets, printers, etc.) have a basic set of basic features. Common examples include brightness, contrast, audio features, on/off switches, memory card, battery, etc. These are all things that allow your device to function. The more processing power you have, the better your gaming experience. While PCs are capable of running all types of games, older ones might lack the processor power and graphics capabilities that newer ones have. For a computer game to be played on your computer, it must be compatible with it. For example, if you have an Intel i3 processor, you can run games that were made specifically to run on an i5 or i7 processor. Each type of processor has a different speed and capabilities. General functions of a computer can be divided into separate areas: Internet browsers, document file editing, email, Microsoft Windows, Applications, Applications (Games, Entertainment, etc), Internet programs, Web browsers and Music, video editing and many others. All of these programs are designed to make your computer more efficient, which allows you to get more tasks done. There are many things that you can do on your computer, with or without the use of your web browser, Windows or any other software program. Some tools are available to help you with basic
